WHY CLOVE™

PIONEERING INSTRUMENT ERGONOMICS

CLOVE™, founded in 2015, develops, produces and markets high-tech dental hand made instruments and their tracking system together with premium devices, such as Orthodontic, Periodontic, Extraction, Conservative, Surgery & Micro Surgery, Implantology & Prostheses appliances and more. With the innovative product design and high-tech production technology we are the fastest growing manufacturer of hand made instruments.

INNOVATIVE PARTNER

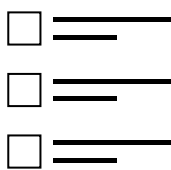

Whether it comes to the design or the production of the CLOVE™ instruments, we focus on the specific needs of the dental experts. We are in a constant communication with the end users of our products to keep our product development on the cutting edge. Our radical product theses of the stunning designs a thicker handle, optimized shape, elastic surface, lightness and color coding – have become industry wide standards in the 21st century.

The ergonomics has been the guiding light of our product development since the establishment of the company. Based on new research we now know more than ever about ergonomic instrumentation. With contemporary coating technology we are able to add on additional features, that offers unique benefits for you and your patient. Sharpen free periodontal and non-stick restorative instruments are finally reality.

HIGH-TECH PRODUCTION TECHNOLOGY

Like every true professional we also aim for the ultimate perfection in our work. CLOVE™ devotes its entire product development and production process to achieve the best possible quality in all our products for you to have the very best tools to work with. We deliver the highest of quality to guarantee your success in the treatment results. All CLOVE™ products are produced in Poland, combining high-tech production technology with handmade craftsmanship to gain a top-quality end result and highest functionality.

ENGLISH PATTERN TOOTH EXTRACTION FORCEPS

Our Extraction forceps are specifically designed to fit in the palm of your hand with durability and sturdiness, by easing patient's anxiety. English pattern forceps are specially designed to get closer to fulcrum at working end, providing greater leverage, easing extraction. Our Extraction Forceps can be serrated unless otherwise indicated.
